

[UNHCR in Bangladesh](#)

18 June 2020

Relentless rain in Cox's Bazar in the past days has led to flooding & soil erosion in the #Rohingya camps.

UNHCR & partners are assessing the damage & assisting affected families to relocate temporarily, while providing much needed support and repairs to damaged shelters.

Initial estimates are that over 4,500 people have been affected, with over 120 families being supported to temporarily relocated after their shelters were destroyed.
